Strategy and Strategic Plan

The strategy is the clear conception of the actions necessary to reach the expected results. In Archery, the strategy of the Federations aims at increasing the practice of Archery at the National Level and having sustainable and increasing sports results.

The Federation must have fundamental elements such as Vision, Mission, Objectives, Goals and Annual Indicators; additionally it should conduct a clear and specific analysis of the surrounding conditions in the National and the International scenarios in which the Federation takes part.

Annual Work Plan

The Annual Work Plan is a planning tool for every Sports Federation. It aims at organizing the actions to take annually in order to meet the requirements of the strategy of each Archery Federation and to guarantee a sustainable sports development at the national level. The ultimate goal will be the solid increase in sports performance at high level International Events.

Sports Potential

The Sports Potential is the result of measuring statistical variables that reflect the national state of sports enrollment, coaches, local sports organizations, preparation of national and international tournaments and international potential events, all this as a result of the activities, the strategy and the Annual Work Plan of each Federation.

International Results

This is the end of a process that implies Strategic Planning, Annual Action Plans, Measurement and Achievements in Management Results and National Sports Potential. These elements are necessary to achieve constant and increasing international results. For sustainable results, the relevant conditions according to each Federation should be created. These specific conditions are created through the implementation of an evaluation model that should be the guidelines for the work of the National Sports Federation.
